Kuwait Ministry of health

## EXPERIENCE

### DOCTOR

*King Abdullah Medical City, Makkah, Makkah / Aug 2016 - Present*

- Monitor patient before, during, and after anesthesia and counteract adverse reactions or complications.
- Provide and maintain life support and airway management and help prepare patients for emergency surgery.
- Record type and amount of anesthesia and patient condition throughout procedure.
- Examine patient, obtain medical history, and use diagnostic tests to determine risk during surgical, obstetrical, and other medical procedures.
- Position patient on operating table to maximize patient comfort and surgical accessibility.
- Decide when patients have recovered or stabilized enough to be sent to another room or ward or to be sent home following outpatient surgery.
- Coordinate administration of anesthetics with surgeons during operation.
- Confer with other medical professionals to determine type and method of anesthetic or sedation to render patient insensible to pain.
- Coordinate and direct work of nurses, medical technicians, and other health care providers.
- Order laboratory tests, x-rays, and other diagnostic procedures.
- Diagnose illnesses, using examinations, tests, and reports.
- Manage anesthesiological services, coordinating them with other medical activities and formulating plans and procedures.
- Provide medical care and consultation in many settings, prescribing medication and treatment and referring patients for surgery.
- Inform students and staff of types and methods of anesthesia administration, signs of complications, and emergency methods to counteract reactions.
- Schedule and maintain use of surgical suite, including operating, wash-up, waiting rooms, and anesthetic and sterilizing equipment.
- Instruct individuals and groups on ways to preserve health and prevent disease.
- Conduct medical research to aid in controlling and curing disease, to investigate new medications, and to develop and test new medical techniques.
- Administer anesthetic or sedation during medical procedures, using local, intravenous, spinal, or caudal methods.

### DOCTOR
