DIPLOMA SUPPLEMENT

Qualification number: 364/SE-ÁOK-ORVOS/A/2022

1. HOLDER OF THE QUALIFICATION

1.1. Family name(s)

AL MATRAFI

1.2. Given name(s)

Torky Mohammed A

1.3. Place (country, town) and date of birth

United Kingdom, London 30.09.1996

1.4. Student identification number

XXFW5L/ 73066714954

1.5. Master file number

AA27-8/15.

2. INFORMATION ON IDENTIFYING OF THE QUALIFICATION

2.1. Qualification and title conferred (in complete and shortened form)

Doctor of Medicine - dr. med.

2.2. Field(s) of study for the qualification

Medicine

2.3. Name, institution identification number and status of awarding institution

**Semmelweis University (FI62576), non-governmental higher education institution
recognized by the state in Hungary**

2.4. Name, institution identification number and status of institution (if different from 2.3) administering studies

2.5. Language(s) of instruction/examination

English

3. INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1. Level of qualification, EQF level

**Unified, undivided training
7th level**

3.2. Official length of program according to training and
learning outcomes requirements

12 semesters

3.3. Access requirements

Successful secondary school-leaving examination and meeting the entrance requirements.

4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1. Program Requirements

4.1.1. Program requirements determined by law, act

Order No. 15/2006. (IV.3.) OM on the training and graduating requirements of basic and master training programs

4.1.2. Aim of study

The goal of general medical education is to train professionals with higher education, who participate in health care and perform medical activities on the basis of the knowledge, professional skills, medical approach and behavior acquired in the course of the training, who make their decisions and act with the utmost consideration of the different characteristics, human dignity and rights of their patients, and who will perform individual specialist medical activities in the field of their chosen speciality, upon the performance of the specialist training, documented by the successful specialist examination.

4.1.3. Required number of credit points

360

4.1.4. System of knowledge checking

The main forms of recitation: term mark - for practical courses (to check the practical skills gained in the subject), exam (to check the knowledge gained in a course unit of the subject), comprehensive exam (recitation of the synthesized knowledge of a multi-term subject), degree thesis (the individual scientific elaboration of any subject of medical science is meant to encourage students to develop their substantial way of thinking, to acquire the methods of using libraries and literary research and to express their view in a concise and explicit way), final exam (to check the student's thorough knowledge and preparedness in the course of a practical professional exam, a patient examination, a written multiple choice and an oral examination).

4.1.5. Required professional practice, credit value

1-1 month summer practical course in nursing, internal medicine and surgery.

Practices of the 6th year: 6 weeks internal medicine, 1 week infectology, 1 week family medicine, 4 weeks surgery, 1 week traumatology, 1 week vascular surgery, 6 weeks pediatrics, 4 weeks obstetrics and gynecology, 3 weeks neurology, 3 weeks psychiatry, 2 weeks emergency care, 1 week transfusion course, 6 weeks optional clinical practice. Students of the 6th year should perform: 40 study hours weekly.

Both semesters include a 14-week period for lectures, class practices and laboratories. Both semesters are followed by an examination period. The length of the lessons (lectures, class practices and laboratories) is 45 minutes.

4.2. The individual subjects/marks/credit

4.2.1. Knowledge acquired during studies (credit point, grade)

Total number of credits: 364

4.3. Grading scheme and grade distribution guidance

The knowledge of the student is evaluated in a five grade grading scheme. Assessment of internship before the 2018/2019 academic year: "fulfilled" / "not fulfilled", Assessment of internship after the 2019/2020 academic year: Rating scale of five grades. The evaluation "not fulfilled" has got a delaying force.

Qualification of the diploma: 4,51 - 5,00 summa cum laude, 3,51 - 4,50 cum laude, 2,00 - 3,50 rite.

4.4. Overall classification of the qualification

Cum laude (4,03)

5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1. Access to further study

The diploma entitles to join doctorate course (PhD).

5.2. Professional status

According to § 110. of law 154. of 1997, the diploma entitles its holder to perform medical activity under the supervision of a person with specialist qualification.

The diploma entitles to join the residency (specialist) training system and - upon the successful performance of the appropriate specialist training programme and specialist examination - to perform individual specialist activity in the field of the holders speciality.

The Ministry of Foreign Affairs and Trade of Hungary certifies the seal and signature of the Oktatási Hivatal appearing on this document. The legalisation does not certify the content of the document for which it was issued.

6.1. Other information

6.2. Information on the Institution

Semmelweis University was established as the spiritual heritage of University of Nagyszombat (founded in 1635), while the legal status of the Faculty of Medicine itself was laid down in the Diploma Inaugurale in 1769. The Faculty of Medicine is the largest among the 6 faculties of Semmelweis University, providing undergraduate medical training in Hungarian, English and German languages. Besides, the Faculty of Medicine has an important role in postgraduate training as well, serving as the leader of one of the four specialist training regions of Hungary, and as the organiser of continuing education within the region. The goal of the Faculty of Medicine is to provide high level education that meets the challenges of the third millennium, the expectations of the WHO and the national requirements, and results in an internationally equivalent diploma.

The training consists of three periods: theoretical, preclinical and clinical. The first two years are devoted to basic theoretical sciences: medical chemistry, medical biology, medical physics and statistics, anatomy, histology and embryology, biochemistry and physiology. The third year is that of the so called transitory preclinical studies, when students are still taught mainly theoretical subjects, many of them having tough significant clinical aspects and concerns: pathophysiology, microbiology, pathology and internal medicine. In the last three years (4-6) of training clinical subjects are prevailing.

Head of Division

8. INFORMATION ON THE HUNGARIAN HIGHER EDUCATION SYSTEM

(modified in April 2020)

8.1. Types of Institutions and Institutional Control

The establishment and operation of higher education institutions are regulated by Act No. 204 of 2011 (National Higher

Education Act). Operating within the legal framework of the National Higher Education Act, Hungarian higher education institutions are recognized state (public) or non-state (church or private) institutions. The list of recognized institutions is indicated in Annex 1 of the National Higher Education Act. Higher education studies are offered at two types of higher education institutions, *egyetem* (university) and *főiskola* (college). Universities and colleges may offer courses in all three training cycles. The programmes are identical at both types of institutions.

8.2. Types of Programmes and Degrees Awarded

The consecutive training cycles of higher education leading to a higher education degree are *alapképzés* (Bachelor course), *mesterképzés* (Master course) and *doktori képzés* (Doctoral course). In cases set by government decree or legislation, Master degrees can also be awarded after the completion of integrated, one-tier training.

In addition to the aforementioned, higher education institutions may conduct non-degree vocational higher education programmes and postgraduate specialist trainings and may offer adult education within the framework of lifelong learning as well.

Higher education institutions apply a credit system based on the European Credit Transfer and Accumulation System. Accordingly, one credit stands for an average of 30 hours of student workload.

8.3. Approval/Accreditation of Programmes and Degrees

In the case of each vocational higher education programme, Bachelor and Master course, the programme and outcome requirements are set in legal regulations, i.e. the level of the training, the professional qualification that can be obtained and all the competencies the acquisition of which are the preconditions for obtaining the diploma in the given programme.

Upon request of the higher education institution, the Educational Authority – after having obtained the expert opinion of the Hungarian Accreditation Committee – licenses and registers the launching of all vocational higher education programmes, a Bachelor or Master courses or Doctoral schools. Also, the operating licenses of higher education institutions are revised by the Educational Authority in every 5 years, taking into account the expert opinion of the Hungarian Accreditation Committee. The above mentioned procedures apply for all recognized, state or non-state higher education institutions, except for religious studies, since the Hungarian Accreditation Committee and the Educational Authority have no competence over the quality assurance in this field. In the case of religious studies only the requirements in respect of infrastructure can be examined.

8.4. Organisation of Studies

Students studying in vocational higher education programmes, Bachelor and Master courses, as well as postgraduate specialist trainings complete their studies by passing a final examination. The final examination may consist of the defense of the degree thesis or diploma project, and additional oral, written or practical examinations.

8.4.1. Vocational Higher Education Programmes

The diploma obtained on completion of a vocational higher education programme testifies a vocational higher education qualification, but it is not per se an academic degree. A vocational higher education programme requires the completion of at least 120 credits, and the duration of the programme is a minimum of 4 semesters.

8.4.2. First/Second Cycle Degree Programmes

The first higher education degree is the *alapszokozat* (Bachelor degree) ending in a professional qualification. A Bachelor course requires the completion of 180 to 240 credits. The length of the programme is 6-8 semesters.

The second higher education degree is the *mesterszokozat* (Master degree) ending in a professional qualification. Based on a Bachelor course, Master courses require the completion of 60 to 120 credits. The length of the programme is 2-4 semesters.

8.4.3. Integrated Programmes

The integrated, one-tier programmes, which are based on the secondary school leaving examination (*érettségi vizsga*), lead to *mesterszokozat* (Master degree), have the length of 10-12 semesters and require the completion of 300 to 360 credits. Besides teacher education, religious studies and some programmes of arts, e. g. the following programmes are offered as integrated programmes: veterinary medicine, architecture, dentistry, pharmaceuticals, law and medicine.

8.4.4. Specialised Graduate Studies

Higher education institutions may also offer *szakirányú továbbképzés* (postgraduate specialist training) for Bachelor and Master degree holders in this type of a training. Through the completion of 60 to 120 credits a specialised qualification can be obtained. The length of the programme is 2-4 semesters.

8.4.5. Doctoral Programmes

Doctoral courses that began before 1 September 2016 require the completion of at least 180 credits. The duration of the programme is 36 months.

Doctoral courses beginning after 1 September 2016 require the completion of at least 240 credits. The duration of the programme is 8 semesters. During the programme, at the end of the fourth semester a complex examination must be completed. The doctoral thesis must be submitted within three years after the completion of the examination.

Regardless the date of entering a doctoral course, either within the framework of the doctoral course or following it, through a separate degree obtaining procedure, the scientific degree "Doctor of Philosophy" (abbreviated as PhD), or in the field of art "Doctor of Liberal Arts" (abbreviated as DLA) may be obtained. The maximum duration of the degree obtaining procedure is 2 years.

8.5. Grading Scheme

The performance of students is generally assessed following a five-grade scale: excellent (5), good (4), satisfactory (3), pass (2), and fail (1) or a three-grade scale: pass with merit (5), pass (3), and unsatisfactory (1). Nevertheless, higher education institutions may also use other systems for assessment if they are comparable to those mentioned above.

8.6. Access to Higher Education Programmes

The ranking of students applying for higher education programmes is primarily based on their secondary school grades and their *érettségi vizsga* (secondary school leaving examination) results or based solely on the latter. The requirement for admission to vocational higher education programmes, Bachelor and integrated Master courses is the secondary school leaving examination taken – as a rule – after the completion of the 12th grade of a secondary school, certified by the *Érettségi bizonyítvány* (secondary school leaving certificate). The admission to certain programmes may also be based on health or professional requirements or aptitude tests. To Master courses students holding a Bachelor degree can be admitted. To postgraduate specialist trainings students holding a Bachelor or a Master degree may be admitted. To Doctoral courses only applicants holding a Master degree can be admitted. Higher education institutions may set additional requirements for admission to Master, postgraduate specialist and Doctoral courses.
